**WHERE EXPERIENCE
MEANS A WORLD OF DIFFERENCE.**

Airtech Environmental Services Inc.

is an environmental consulting firm that specializes in the sampling, analysis, and monitoring of air emissions. Airtech is committed to providing the highest quality services while providing these services in a cost-effective manner. Airtech personnel are experienced professionals that are able to adapt to the most diverse industrial settings. Thorough knowledge and practical experience in virtually all published and approved test procedures enables our staff to better serve our clients' air emission and process control needs.

THE AIRTECH DIFFERENCE

Thanks for taking time to be thorough.....you are saving us money

and making the product better.

Great job, as usual.

I am glad you feel empowered

to jump into our decision making

process and to own part of this study.

We truly look at Airtech

as a partner.

RICHARD LAMBERT
ELI LILLY AND COMPANY

DIFFERENCE

EXPERIENCE

Experience makes the difference with Airtech. Our company principals each offer over 12 years experience and are in the field working on day to day business to ensure that expertise and quality are brought to every job. All Airtech field personnel are seasoned professionals so you always get an experienced emissions experts working for you.

QUALITY

The highest quality testing and monitoring services ensure greater confidence in your data. We pay attention to details in a business where details are everything and can usually mean the difference when determining compliance.

CUSTOMER SERVICE

Excellent customer service means your needs are met quickly and efficiently. Airtech maintains a standard where one person is the point of contact for a given client. This results in a clear channel of communication that allows us to form and maintain long term relationships.

FLEXIBILITY

Airtech works with clients to solve their problems. Airtech is flexible to meet your schedule and situation no matter how quickly a solution is required.

TIMELINESS

Our mobile laboratory allows us to offer you on-site analytical services so you never need to wait for results. Preliminary data is supplied in the field and final reports are submitted in a timely manner.

CONTINUING EDUCATION

Thorough knowledge of regulations means your time is not wasted on irrelevant or outdated requirements. Constant equipment updates and Airtech team education keep us at the forefront of advanced technologies and current regulations.

REAL VALUE IN EMISSIONS TESTING AND MONITORING COMES FROM THE EXPERIENCED, QUALITY ORIENTED EXPERTS AT AIRTECH.

SOURCE EMISSIONS TESTING

- Compliance testing.
- Trial burn testing at BIF sources as well as municipal, medical and hazardous waste incinerators.
- Process evaluation testing to minimize air emissions, maximize production, and minimize operating costs.
- On-site semi-continuous monitoring for organics and sulfur compounds using gas chromatography (EPA Methods 15, 16 and 18).
- Methodology development for new or difficult pollutants and sources.
- Capture efficiency determinations using mass balance or temporary/permanent enclosures.

ON-SITE RESULTS

We emphasize on-site analytical services so you know the results before we leave your site. This allows you to make appropriate process changes on the spot and thus avoid a costly retest. On-site analytical services include CEM's, gas chromatography, ion chromatography, various titrations and gravimetric analysis.

TECHNOLOGY DEVELOPMENT

We realize that technology changes rapidly. Certain emerging technologies might be suitable for specific applications. At Airtech we work with equipment manufacturers in the evaluation of new testing and monitoring equipment. Through our experience we can determine if these technologies are suitable for a given test program. Technologies we have worked with include Fourier Transform Infrared Spectrometry (FTIR), continuous particulate monitoring equipment, and miniature high speed gas chromatographs.

We have been using the services of Airtech for all of our air pollution control equipment efficiency testing at two of our largest manufacturing facilities.

We have been extremely happy with the quality performance, professionalism and cost effectiveness of Airtech.

ENVIRONMENTAL AFFAIRS
SCHMALBACH-LUBECA WHITE CAR, INC.

CONTINUOUS EMISSIONS MONITORING (CEM SERVICES)

- Install temporary or permanent CEM systems.
- Perform periodic CEM maintenance.
- Expertise in particulate continuous emissions monitoring (PM CEMs).
- Perform CEM certifications including Relative Accuracy Test Audits (RATA) and Cylinder Gas Audits (CGA).
- Experience with organic CEMs which utilize gas chromatography.

OTHER SERVICES

- Develop test and trial burn plans.
- Incinerator spiking.
- Analytical services.
- Permit preparation.
- Report and protocol review.
- Training and instruction on testing and monitoring procedures.
- Independent auditing and observation of test programs conducted by other firms.
